"The surprises are manifold and moments that are heart-jolting add to the excitement..."

Fossil Mountain Publishing believes that some of the best books read as if they were 3D movies.

DALLAS - *GeorgiaChron* -- Colorful backpacks filled with paper and pens, binders and books can be seen on the shoulders of bright-eyed young faces across the globe. The school year is officially underway and parents everywhere are scrambling each morning to get their little ones off to class. Between juggling their cup of coffee and grabbing their cell phone, parents barely have enough time to...breathe. Evenings are no better.

Although parents regularly ensure that their children make it to their public library, finding time to take a monthly trip to your local bookstore can enhance your child's educational experience, even further. Bookstores can inspire and help instill a love of reading, on any budget. Displays are designed to spark a child's curiosity, interest, and imagination. Children have long cherished their favorite books and stories,

which may explain why you will seldom find a *Harry Potter* book at a used bookstore.
